

ergotron®

Since our founding more than four decades ago, we've used movement to remove constraints from how people create, collaborate and work with technology. We rely on ergonomic principles, user-centered designs and more than 200 patents to build kinetic work environments that help people thrive.

Monitor Mounts

Well-being is within an arm's reach

An active sit-stand workstyle represents just one aspect of a workday that moves. With Ergotron's monitor arms, you can harness even more productivity, collaboration and comfort.

Monitor arms help keep your monitor at the right height whether sitting or standing for an ergonomic fit. Using a monitor arm on its own or with a standing desk supports overall wellness while offering flexible, personalized screen views. By freely moving one, two or three monitors, you can work smarter and free up valuable workspace.

Sit-Stand Workstations

The broadest portfolio for the perfect fit

Our products foster a workplace culture of movement, encouraging active workstyles that benefit employers and employees with improved comfort, flexibility and collaboration.

Every body and every workspace is different. With the widest selection of styles, sizes and attachments, Ergotron's WorkFit® sit-stand solutions help employees find their best fit. With the ability to easily go from sitting to standing and back again, they can choose how they work in an environment that inspires creativity and long-term results.

ENVIRONMENTALLY RESPONSIBLE

Reducing Our Footprint While Growing

Our dedication to quality allows our company to reduce its environmental footprint, even while we grow, by using characteristic innovation and state of the art management practices to find efficiencies wherever possible.

Sustainable Packaging

Company-wide, we're making a focused effort to transition many packaging components to sustainable materials. This includes replacing non-recyclable elements with alternative solutions like paper-pulp packaging that are easily recyclable or compostable. We're also minimizing the amount of packaging materials we use overall and consolidating products into fewer boxes to reduce waste. It's about supporting an environmentally friendly workstyle that you can stand behind.

Elimination of Toxic Substances

Products comply with all international environmental regulations related to design, manufacture and packaging

Result: RoHS compliance ensures removal of lead, cadmium and other toxic substances from the production stream

Aggressive Reclamation & Recycling

All scrap products are disassembled and facility trash is sorted for the most efficient recycling possible

Result: Over 90% of potential waste avoids landfills, with materials instead being recycled, reused or composted

Continuous Efficiency Improvements

Demonstrated commitment to best-practice procedures in environmental management

Result: Quality control systems and procedures are ISO 14001:2015 certified at our China facility and compliant at our U.S. and Netherlands facilities

Reduce Future Purchases

It is our policy to create professional-grade products that are safe and durable. Products with a long useful life are more environmentally sustainable and deliver a strong ROI. If necessary, Ergotron products can be repaired, and parts are available to facilitate maintenance and servicing.

Ergotron's Compliance Index for Products

	Regulation	Ergotron Performance
RESTRICTED MATERIALS	EU RoHS (2011/65/EU) directive restricting use of lead, cadmium, mercury, hexavalent chromium, PBB, PBDE and other substances: Learn more	100% compliance
REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals)	EU REACH regulation (EC) No. 1907/2006 ensures a high level of protection of human health and the environment	100% compliance
SUSTAINABLE BUILDING	Green Star guideline from Green Building Council Australia (GBCA) for adoption of sustainable building practices	Eligible product line compliant with GBCA criteria
BATTERIES	EU Battery (2006/66/EC) directive restricting mercury and cadmium in batteries and specifying labeling and recycling requirements	100% compliance
ELECTRONIC EQUIPMENT	EU WEEE (2012/19/EU) directive requiring management of collection and handling (including recycling) of electrical products: Learn more	100% compliance
PACKAGING	EU (94/62/EC) directive on reduction of Packaging and Packaging Waste	100% compliance

Recycling Resources

To assist in recycling, disassembly guides for some of our main product families can be found on our website. Products can be disassembled with standard tools and no special training is required. Additionally, documentation on end-of-life recovery options is available upon request.

Whether at home or in the office, everyone deserves a workspace that looks great and makes them feel their best. Create a neat, productive workspace with the **NX Monitor Arm**, an affordable monitor arm that's easy to set up and backed by Ergotron's trusted reputation for quality. Available in white or matte black.

Available in single or dual monitor versions, the **MXV Desk Mount Monitor Arm** offers exceptional ergonomic comfort and helps enhance productivity. Extremely slim and sleek, the MXV Arm blends naturally with a modern office environment and supports displays weighing up to 9,1 kg. With removable rotational stop,

it offers a high level of functionality and adjustability, while occupying only the desired working space. MXV arms help keep your workspace tidy, thanks to the streamlined cable management system. The patented Constant Force™ technology allows effortless height adjustment according to your needs. Available in white and black matte.

The **LX Single Arm** provides a comfortable fit with full monitor movement and improved ergonomics for screens weighing up to 11.3 kg. This luxury arm easily adjusts monitors up to 34" in size and saves space as you place the screen in the best view to tackle each to-do. The streamlined look enhances your work area, plus it's built to last. Available in aluminum, white or matte black. The Tall Pole option provides more height, available in aluminum, white or matte black. The wall arm allows for space-saving convenience, available in aluminum, white or matte black.

With all the benefits of an LX Arm, the **Tall Pole** version allows greater range of vertical monitor positioning. It also enhances productivity, allowing you to use up to four screens at the same time. It is available in aluminum, white or matte black.

LX Dual Direct with the LX low-profile crossbow allows monitors to move simultaneously with ease to reclaim valuable desktop space. Screens pivot up and down independently, providing a full motion range, optimal monitor alignment and high levels of collaboration and productivity.

With a total weight capacity of 9,9 kg, LX Dual Direct works with a wide range of monitors. Movement of two screens becomes even easier with the addition of the Dual Direct Handle Kit accessory. Available in aluminum, white and black matte.

Dual Direct Handle Kit

ACCESSORIES

HX Desk and Wall Arms use an innovative post design to free up space with display positioning that supports greater productivity and collaboration. Sleek and streamlined, HX Arms fit large screens weighing up to 19 kg. Desk Arms available in white or matte black, Wall Arms available in white.

The **HX Desk Monitor Arm with HD Pivot** includes a heavy-duty tilt pivot for an immersive viewing experience on ultra-wide, curved displays 15.2–30.4 cm deep and weighing 12.7–19.1 kg. Available in white or matte black.

Arm Mounting Solutions

Ergotron offers a variety of mounting options for LX, HX and MXV arms.

2-Piece Desk Clamp: Attaches to the back or the side of the desk and requires no tools for installation. Compatible with a wide variety of desk sizes and shapes. It requires underdesk space.

Low-Profile Top Mount C-Clamp: Works with many freestanding desks, sliding desks and ones with shallow worksurfaces. Attaches above the desk surface, requiring minimum space under the desk.

Grommet Mount: Allows arm mounting through the desk surface for a harmonized working surface.

Under Mount C-Clamp: Designed for desks with limited space underneath the worksurface; for example, due to cable channels or sliding surfaces.

Zip12 Wall Charging Mount offers a slim storage enclosure, perfect for charging and securing up to 12 tablets. The charging mount is designed to be compatible with tablets from leading manufacturers like Microsoft, Samsung, Apple, Lenovo, HP, Dell, Amazon, Asus, Acer and more. The space-saving profile extends less than 15,2 cm from the wall to help you easily incorporate the charging mount into your workspace while providing easy access with Show & Stow™ technology.

Neo-Flex Mobile MediaCenter improves collaboration and facilitates distant co-working with its video conferencing feature. It can be rolled to the preferred working area to support your needs.

The **LearnFit® Sit-Stand Desk** enhances mobility and ergonomics at work, leading to more productivity and well-being. Easy to move from room to room, it adjusts smoothly to your preferred working position with the squeeze of a hand lever.

INNOVATION IS DRIVEN BY OUR CUSTOMERS' NEEDS.
