

FUNC SHORT THROW MOBILE MOTORIZED

Will do wonders

An ergonomic floorstand for interactive boards

An ergonomic and flexible stand that is easy to move and easy to install. This solution, with its stable design, is perfect for large interactive boards and a rotatable projector pillar allows the system to pass through doorways easily.

The motorized height adjustment (applicable to most markets) is soft and quiet, readily available from a button under the interactive board. Choose SMS universal Short Throw slide to match the projector, alternatively an adapter for projectors with a projector pillar already included.

Ideal for use anywhere where equipment needs to be moved often. The mountings for the interactive board are universal which means the product can be used with most currently available interactive boards on the market.

If you want to use the projector pillar included from the projector manufacturer; [contact us](#) for available adapters.
